TRACK INFRASTRUCTURE PROJECTS

TECHNICAL SERVICES

TRAINING AND SKILLS

TES are proud to offer a complete package of track infrastructure works.

Over many years we have developed our employees by way of robust training and mentoring plans and we now have significant expertise in a range of disciplines. This enables us to undertake significant projects including track renewals.

The services we can provide include:

- General Track Maintenance
- S&C Unit Renewal
- Trial Hole Excavation and Validation
- Track Renewals
- Re-railing
- Project Management
- Stressing levels 1, 2 and 3
- Burning
- Lighting and Welfare Facilities
- MSP
- Site Access
- Security
- Planning Services
- Track Geometry Monitoring
- Minor Civil Works

Our staff are given full training and comprehensive mentoring to ensure that they are competent to carry out their duties in a safe and professional manner.

We see planning and clear communication as vital to the successful delivery of this service and always ensure that comprehensive briefings are carried out so that all parties concerned fully understand the requirements of each individual job.

As with all TES Services the watch words of the Track Infrastructure Projects division are quality, integrity and high standards ensuring the performance of all its outputs.
