CREATING SAFE RAILWAY WORKING ENVIRONMENTS

TRAINING & SKILLS

Unlike some industries, training is not an optional extra in the rail industry, it is absolutely vital. Of course, compulsory does not necessarily mean good. The TES philosophy, however is to lead by example. TES have invested heavily in purpose-built training centres. Our training suites are fully equipped with the most modern training aids and furnishing, providing the ideal environment for learning.

TES have always endeavoured to create a learning environment where building elite safety teams and developing safety solutions to maximise working time demonstrates the company's commitment to continuous improvement in all areas.

TES aims to be the best by ensuring that our employees are fully trained in a range of competencies and railway skills. TES believes that by training staff to be competent in wide range of skills the company is able to provide an all round professional service that can be relied upon to meet our clients ever changing needs.

Our in house training teams are committed to providing training, mentoring and assessment at the highest level to ensure that staff are always up to date and prepared to deal with every scenario in their working environment.

The majority of the company's operational staff are employed on salaried contracts, providing them with security and allowing TES to guarantee delivery.

We believe strongly in development and we always aim to get the best from our employees by supporting and encouraging them to gain new skills and competencies with the help of a structured career progression plan.
